

**B**eaver Steel Services has been a family owned and operated company since 1989. Originally serving the HVAC metal contractors, the company now provides flat-rolled carbon steel to manufacturers, fabricators and job shops within a 300-mile radius of Pittsburgh, PA.

**B**eaver Steel credits their success and foundation of their organization as being built on short lead-times, competitive pricing, quality service and customer satisfaction.

The company's operational capabilities include (2) cut-to-length, multi-blanking lines with Herr-Voss leveling capabilities of 10gauge (.135) to as light as 32 gauge (.008) along with first operational shearing is available on one of our (2) re-square shears.

**B**eaver Steel also offers value added fabrication processing with (2) automatic load CNC Trumpf lasers able to cut up to ¾" mild steel, press brakes, punches and a powder coat paint line.

The company's owned fleet allows deliveries with flexibility "just in time" to meet their customers' requirements.

The organization's mission is "to provide first class customer service by thoroughly understanding our customer's needs and consistently delivering steel, industrial products and services to our customers that meet or exceed their expectations."

When asked about a key driving factor for joining **North American Steel Alliance**, founding owner and president Tony Treser stated, "It gives us a great opportunity to work with great suppliers that understand the customer's need for excellence and collaborate with steel service centers that share our vision of growth and customer service."

**B**eaver Steel joins NASA as its 124<sup>th</sup> metal service center member/owner. Click [here](#) to learn more about NASA's new member organization.
