

FOR IMMEDIATE RELEASE

Chicago, IL – April 1, 2021 – The North American Steel Alliance (NASA) announces the addition of South Atlantic Galvanizing as the newest Member-Owner company of North America’s largest [metal purchasing cooperative](#).

What started in 1969 with one location and 40 employees has evolved into what is now known as South Atlantic Galvanizing with 10 locations and 400 employees. Their dedication to expansion throughout the 80’s and well into the 2000’s has allowed them to diversify their corporate portfolio into the areas of Galvanized Steel, Galvanized Rebar, Grounding and Masonry Products. With nine coating facilities located strategically across the Southeast as well as a centralized manufacturing facility in Tennessee South Atlantic Galvanizing is well positioned for continued growth and success. www.southatlanticllc.com

“South Atlantic Galvanizing has interacted with many NASA Member-Owner companies through the years, and we could not help but take notice of the countless positive comments these companies had to share about the organization. After doing our due diligence, we quickly realized how much sense it makes to join. The networking with both Suppliers as well as fellow Member-Owners alone makes joining worth it. South Atlantic Galvanizing is very excited to join NASA in 2022.”
