

Texas Iron & Metal is a family owned and operated company that began in the 1920s and officially opened the doors of their first location in 1939. At first they were in the scrap business, but over time, steel and pipe distribution became their main business. Serving a variety of industries – including agriculture, construction, fabrication, manufacturing and ship building – Texas Iron & Metal offers a selection of steel and pipe products as well as industrial warehouse equipment and products.

Starting from humble beginnings, Texas Iron & Metal has grown to be the premier steel and pipe supplier, selling and delivering prime material within a 100-mile radius of Houston and even shipping some products to most parts of the United States. They stock all types of steel including carbon and stainless and various alloys in 100,000 square feet of warehouse and 10-acres of stockyard.

Texas Iron & Metal prides itself on providing customers the product they need based on their sense of urgency. Because of their dedication to meeting customers' steel and pipe needs, the company offers saw cutting and shearing services up to 1/2" x 12'. They also deliver product with their own fleet of trucks and they load customers' trucks very quickly.

Texas Iron & Metal President Max Reichenthal is excited to join the **North American Steel Alliance (NASA)** and stated, "We had been thinking about becoming a member of

NASA for some time. Our participation was originally centered around networking opportunities with those in the co-op. We look forward to exploring the purchasing power that has been built. I will enjoy contributing to the growth of our alliance."

Texas Iron & Metal joins NASA as its 123rd metal service center member/owner. Click [here](#) to learn more about their company, steel and pipe products and unbeatable service.
